

C++ Student Management System - Review

What's Good:

- Clean and readable code structure
- Core features implemented (Add, Display, Search, Delete)
- File handling included
- Uses OOP concepts (class and objects)
- Menu-driven interface

Improvements Needed:

1. Name input only supports single word → use `getline()`
2. No update/edit feature
3. No duplicate ID validation
4. File handling overwrites data
5. No error handling for file operations
6. UI can be improved with better formatting

Overall Rating:

Functionality: 8/10

Code Quality: 7/10

Level: Beginner to Intermediate

Suggestions to Improve:

- Add login system
- Add marks and grading system
- Add update/edit option
- Use binary file storage
- Create GUI version using Qt
